

GhostMouse

Version: GhostMouse 2.0

GhostMouse is a lightweight program that allows you to record your mouse movement and clicks and plays them back.

You have the option to either do 1 playback, or infinite Loop by Clicking Play while recording.

Download Instructions

For only the program, click on the following link:

<https://github.com/ketaketish/GhostMouse/releases/download/V2.0/ghost-mouse-2.0.exe>

For all other files, please clone Git branch

Hotkeys

Hotkeys	Description
---------	-------------

Ctrl + N	New File
----------	----------

Ctrl + O	Open File
----------	-----------

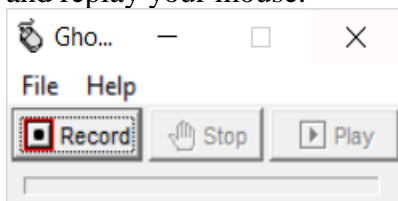

Ctrl + S	Save File
----------	-----------

Ctrl + Alt	Pause Playback
------------	----------------

Instructions

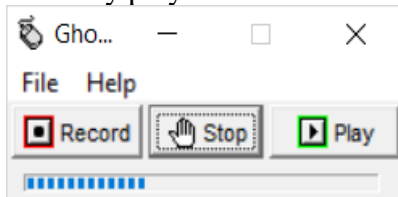

1. Opening the program

Upon first boot, place the window in an area that does not obstruct the area where you will use and replay your mouse.

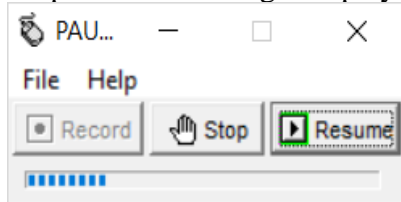

2. For single playback

Once you are satisfied with your recording, Click **Stop**. This will make it so that your recording will only play once and then stop.

3. Pausing

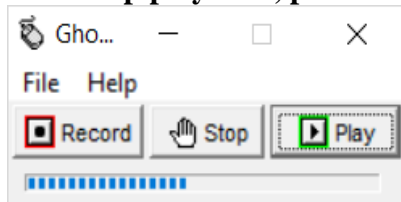

To pause a recording or a playback, press **Ctrl + Alt**

4. For multiple/infinite playback

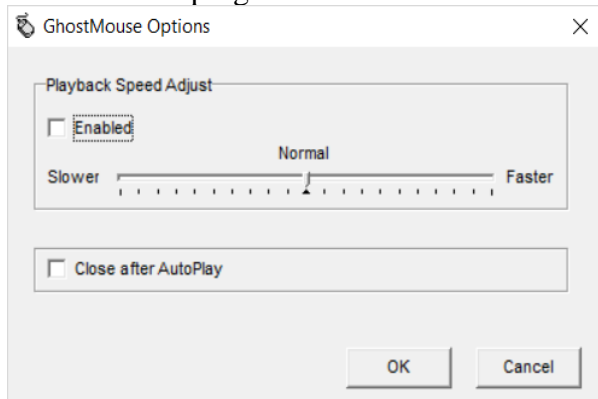

Once you are satisfied with your recording, if you click **Play**, the recording will immediately begin. The recording will always finish by re-clicking on **Play** and restarting the recording.

****To stop playback, press Ctrl + Alt.****

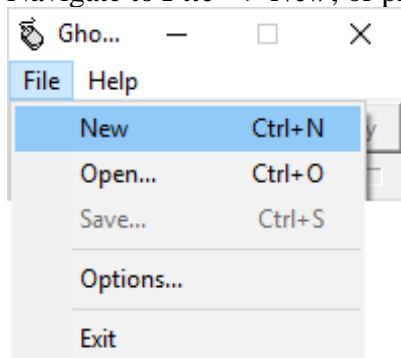

5. Options

For options, navigate to **File --> Options**, you will find the following page: From here, you can adjust the playback speed of your recording to make your mouse move slower, or faster. You can also make the program close after the recording has been played.

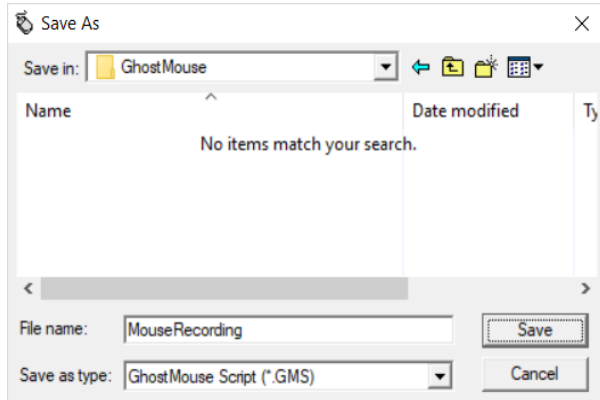

6. New Recording

Navigate to **File --> New**, or press **Ctrl + N**.

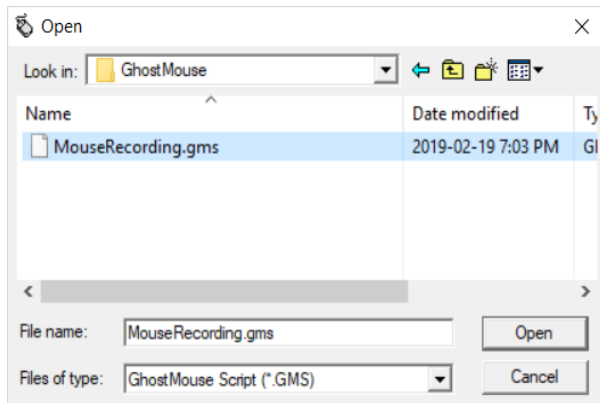

7. Saving

Navigate to **File --> Save**, or press **Ctrl + S**. GhostMouse recordings are saved in a **.GMS** Format.

8. Opening a GhostMouse File

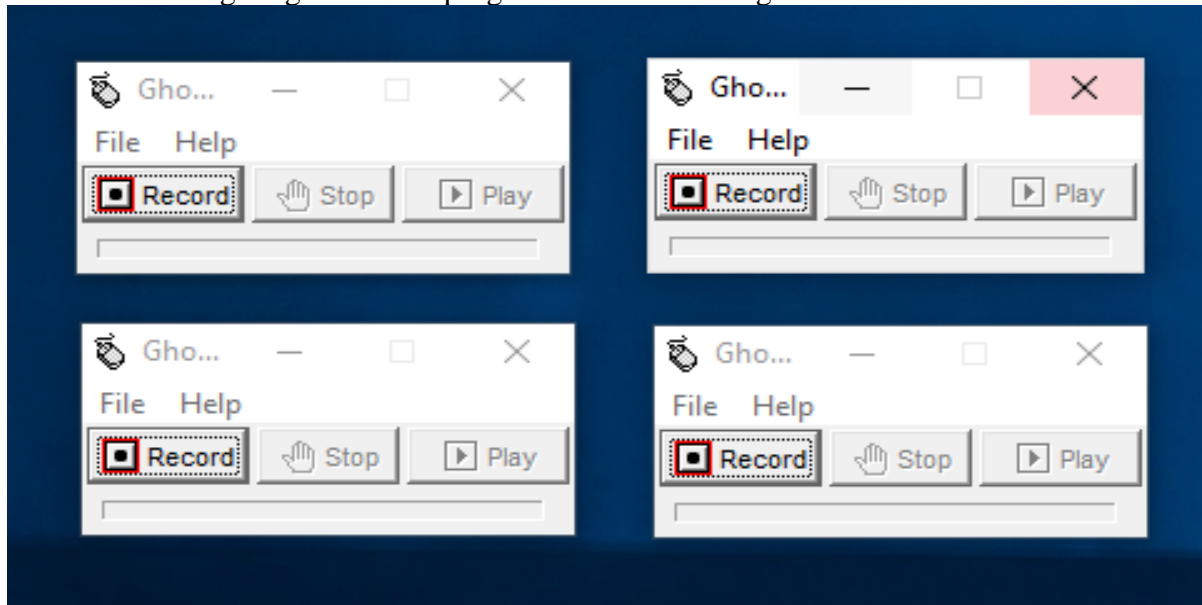

Navigate to **File --> Open**, or press **Ctrl + O**. GhostMouse recordings are saved in a **.GMS** Format.

Extras

You can have multiple windows of GhostMouse opened at once. You can Make one of the recordings click **Play** from another window and start that playback instead. Useful if you wish to

create a recording longer than the program's maximum length.
